# Securing the Skies

The Cybersecurity and Airport Administration Program is strengthening the aviation cybersecurity workforce in the United States

## A Critical Need

The U.S. aviation industry is critical national infrastructure. As airport operations become more connected, they face a growing risk of cyber threats, but there is a significant shortage of technicians who can bridge the gap between IT security and airport administration.

## Our Solution

Cuyahoga Community College created the Airport Cybersecurity Certificate, a first-of-its-kind program that trains a new workforce to protect the aviation sector.

## A Program Built for Impact

**3** Cohorts  
launched

**11** Credit  
hours

**5** Stacking  
creds
